# A Balancing Act

It began as a dream. "What if I could start a company that gave women the opportunity to reach their dreams?" Cindy Monroe, Founder and President of Thirty-One, never thought that a simple dream could turn into such a rewarding reality. But it happened, and she is now helping women like you achieve the same thing through Thirty-One.

"I worked full-time and still had a family to take care of, but I knew there had to be a better way," Cindy said. "I wanted women like myself to be able to spend time with their families, but also have a sense of individuality and satisfaction in their careers. That's what Thirty-One is all about. Having that balance in our lives is so important."

**Julie Sutton, Thirty-One's Vice President**, joined the company in 2003. "Initially, I thought it would be a good career move," Julie said. "But the minute I became part of the Thirty-One family, I realized that it was more than just a career for me. My life has become enriched beyond my expectations. Being surrounded by women of all backgrounds, supporting and encouraging each other, and having fun – it's such an amazing atmosphere."

## Our Mission

Thirty-One is more than just a company. We are people who believe in encouraging, recognizing and rewarding others for who they are. Through God's strength, we've built a family of individuals who feel women deserve to treat themselves to something special. Our commitment is to provide women with a fulfilling, enjoyable and rewarding experience.

Thirty-One has become an extremely successful company, now headquartered in two states, and is continuing to grow at an incredible pace. Yet, Cindy and her team are able to enjoy a balanced life, filled with careers they truly enjoy, meeting wonderful people, providing an exclusive shopping experience with fabulous gifts, and most importantly, spending time with their family and friends. It's this balance that makes Thirty-One unique. Come see what we're all about.

# Chic Style

## The Story of these *unique purses...*

In today's day and age, we can all agree that it's important to be environmentally conscious, particularly when it comes to recycling. It's a simple task really, and it benefits us all.

In the past, the term "recycled" brought up images of items that were bland, had no color, and no personality. Thankfully, that is no longer the case. You wouldn't know it to look at them but these fabulous and stylish purses are made from recycled paper!

You are going to adore our new purses and you can feel good about carrying them since they are environmentally-friendly. And, they make a great conversation piece!

## —Psalms 23

The LORD is my Shepherd (white); I shall not want. He maketh me to lie down in green pastures (green): he leadeth me beside the still waters (blue). He restoreth my soul: he leadeth me in the paths of righteousness (clear) for his name's sake. Yea, though I walk through the valley of the shadow of death (black), I will fear no evil: For thou art with me; thy rod and thy staff (brown) they comfort me. Thou preparest a table before me in the presence of mine enemies: thou anointest my head with oil (yellow); my cup (purple) runneth over. Surely goodness and mercy (pink) shall follow me all the days of my life: and I will dwell in the house of the LORD (gold) forever.

■ Due to the slower and cooler burn of the wax, soy candles tend to distribute fragrance throughout the room more quickly.

■ Soy is a natural ingredient, so it doesn't give off toxic fumes or carcinogens when burned, and are less likely to trigger allergies.

■ Soy candles produce very little soot when burned, unlike traditional petroleum-based candles. Cut the mushroom wick for a cleaner burn. Plus, they clean up easily with soap and water!

Once you try Soy Inspirations, you'll be amazed at the difference!

### Not all candles are created equal—

are you surprised? Many people think the only difference between a good candle and a great one is its smell. Well, that couldn't be further from the truth. There are several components to making truly high quality candles, including one of the most recent introductions—soy.

■ Due to their low melting point, soy candles burn cooler and slower so they tend to last 30% longer than petroleum-based paraffin, the ingredient found in most candles.
